**SERVERSIDE GROUP GRANTS CARD CUSTOMIZATION LICENSE TO FLORIDA-BASED CUSO, UNITED SOLUTIONS COMPANY**

London, 24 October 2011 – Global card customization specialist, Serverside Group, today announced the granting of a license of its US card customization patents to Florida-based Credit Union Services Organization, United Solutions Company (USC), and the release of USC from the suit brought against it (and other parties) by Serverside in Delaware.

The license will cover all of USC's existing customers and any future card customization programs with credit unions. USC can now move forward with the peace of mind that the service it is offering benefits from a license of Serverside's patents, providing a robust commercial platform from which it can build and consolidate its market position.

Jim Giacobbe, President/CEO, United Solutions Company Inc, commented:

"We are delighted to have brought this matter to a close and, equally importantly, that we are now able to offer our customers reassurance that they are dealing with a card customization provider that has the necessary rights to offer the service."

Adam Elgar, President, Serverside Group, commented:

"When we started Serverside Group and created the digital card customization market, we made the protection of our intellectual property one of our highest priorities and invested significant resources to this end. We are delighted that United Solutions Company has recognized our innovation in this space and will support it in any way we can in the future."

#### About Serverside

Founded in 2003, Serverside Group is the global technology leader in digital card design and a provider of innovative solutions to issuers, personalization bureaus and card manufacturers.

Serverside has built a market-leading position by running more than 1,000 card programs through its network of over 200 card issuers in 27 countries. Its clients include: RBS Group, ING, Permanent TSB, ANZ, BMW, KBC, Fortis and Heritage Building Society. Serverside is headquartered in London and has offices in New York, Chicago and Auckland.

Serverside is currently taking steps to enforce its intellectual property portfolio, including a suit brought in the United States against fifteen financial institutions and technology vendors that it believes are infringing its patents.
